Pay As Little As $20* on up to 12 prescriptions

*See full program terms and conditions including max benefit below

This co-pay savings offer is only valid for commercially insured and cash-paying patients. This offer is not insurance. It is not valid for prescriptions covered by or submitted for reimbursement in whole or in part under Medicaid, Medicare, or other state or federal healthcare programs, including any state medical pharmacy assistance program.

Patient Instructions: Pay as little as $20 for each prescription of 30 patches. If your out-of-pocket cost is $100 or less, your total cost can be reduced by up to $80 on the next 12 prescriptions after paying the first $20. Reimbursement will be received from Change Healthcare.

Pharmacist: When you apply this offer, you are certifying that you have not submitted a claim for reimbursement under any federal, state, or other government programs for this prescription. Participation in this program must comply with all applicable laws and regulations as a pharmacy provider. By participating in this program, you are certifying that you will comply with the terms and conditions described in the Restrictions section below.

Pharmacist instructions for a patient with Eligible Third Party: Submit the claim to the primary Third Party payer first, then submit the balance due to Change Healthcare for COB (coordination of benefit) with patient responsibility amount and a valid Other Coverage Code, (e.g. B). The patient payment amount will be reduced by up to $80 on the next 12 prescriptions after paying the first $20. Reimbursement will be received from Change Healthcare.

Pharmacist instructions for cash-paying patient: Submit this claim to Change Healthcare. A valid Other Coverage Code, (e.g. J) is required. The patient payment amount will be reduced by up to $80 on the next 12 prescriptions after paying the first $20. Reimbursement will be received from Change Healthcare.

Other Coverage Code required: For any questions regarding Change Healthcare online processing, please call the Help Desk at 1-800-422-5604.

Restrictions: This offer is valid only in the United States. Offer not valid for prescriptions reimbursed under Medicaid, a Medicare drug benefit plan, Tricare or other federal or state health programs (such as medical assistance programs). If the patient is eligible for drug benefits under any such programs, the pharmacist must refer the offer to the payer. By using this offer, the patient certifies that he or she will comply with any terms of his or her health insurance contract requiring notification to his or her payer of the existence and/or value of this offer. It is illegal (or to offer to) sell, purchase, or trade this offer. This offer is non-transferable and is limited to one offer per person. Not valid if reproduced. Void where prohibited by law. Program managed by ConnectRx® on behalf of Noven Pharmaceuticals. The parties reserve the right to rescind, revoke or amend this offer without notice at any time.

Important Safety Information

Important: Daytrana® is a controlled substance (CS) because it can be abused or lead to dependence. Keep Daytrana in a safe place to protect it from theft. Selling or giving away Daytrana may harm others and is against the law. Tell the prescribing doctor if your child has ever used Daytrana or any other stimulant medicine (not including over-the-counter products). Your child should tell you if he or she or anyone else in your family uses Daytrana or any other stimulant medicine.

The Daytrana® patch contains a prescription central nervous system (brain) stimulant medicine used to treat ADHD in children and adolescents 6 to 17 years old. Use of the Daytrana® patch may help increase attention and decrease impulsive and hyperactive behavior. The Daytrana® patch should be used as part of a total treatment program for ADHD that may include counseling or other therapies.

Use of the DAYTRANA® (methylphenidate transdermal system) Patch

The Daytrana® patch contains a prescription central nervous system (brain) stimulant medicine used to treat ADHD in children and adolescents 6 to 17 years old. Use of the Daytrana® patch may help increase attention and decrease impulsive and hyperactive behavior. The Daytrana® patch should be used as part of a total treatment program for ADHD that may include counseling or other therapies.

Important Safety Information

The Daytrana® patch should not be used if your child has been diagnosed as very anxious, tense, or agitated; has a history or family history of Tourette’s syndrome; is taking a monoamine oxidase inhibitor (MAOI) medicine or has discontinued an MAOI medicine in the last 2 weeks; or is allergic to methylphenidate, acrylic adhesive, or any other ingredient in the Daytrana® patch.

Serious heart problems have been reported with the Daytrana® patch or other stimulant medicines including:

- sudden death in people with heart problems or heart defects
- stroke and heart attack in adults
- increased blood pressure and heart rate

Tell the doctor if your child or a family member has any heart problems, heart defects, or increased blood pressure and heart rate. Remove the Daytrana® patch and call the doctor right away if your child has any signs of heart problems such as chest pain, shortness of breath, or fainting while using Daytrana. Before you start using Daytrana, tell your doctor if you have or your child has a history of serious heart problems, including:

- shortness of breath
- swelling, edema
- swelling of the lower limbs
- swelling of the arms, hands, or feet
- swelling of fingers or toes
- heart problems such as stroke and heart attack in adults
- problems such as high blood pressure and heart rate
- arrhythmia
- palpitations
- unexpected changes in weight
- heart murmur

Tell the doctor if you, your child, or a family member has a history of high blood pressure.

Be sure to tell the doctor if your child is pregnant or breast feeding.

Serious side effects such as seizures (this usually happens in children with a history of seizures), painful and prolonged erections (priapism), slowing of growth (height and weight) and loss of skin color (chemical leukoderma) and eye changes or blurred vision have been reported with the Daytrana® patch. Because of the potential for lasting damage, seek medical help immediately if you or your child develops priapism. Your child should have their height, weight, and blood work checked while using the Daytrana® patch and the doctor may stop treatment if a problem is found during these check-ups. Allergic skin rashes may occur:

- Stop using the Daytrana® patch and see the doctor right away if swelling, bumps, or blisters happen at or around the site where the patch is placed. If the patch is worn longer than 9 hours in a day, or if more than 1 patch is worn at a time, too much medicine has been applied. Avoid exposing the Daytrana® patch to direct external heat sources such as hair dryers, heat pads, electric blankets, heated water beds, or other heat sources while wearing the patch. Heating the patch could cause too much medicine to pass into your child’s body and cause serious side effects.

The most common side effects seen while using the Daytrana® patch include skin problems (redness, small bumps, itching) where the patch is applied. Other side effects include appetite changes, anxiety, nausea, vomiting, stomach pain, weight loss, loss of appetite, extra sleeping, mood swings, and decreased interest.

Please read Medication Guide and Full Prescribing Information including the Boiled Warning regarding abuse and dependence.
